THE
CUTTING
EDGE
OF SURFACE PROTECTION MATS

Product Advantages

Up to **75%** Increase in life expectancy over previous surface solutions

Up to **65%** Increase in speed and precision of cutting and trimming

Up to **68%** improvement in preserving existing work surfaces, protecting products you're working on, and avoiding cross-contamination

Up to **50%** Reduction in replacement tool costs by extending tool and blade life

Up to **50%** improvement for ease of spill clean up, reducing liquid absorption, and keeping workspaces clean

Precision. Protect. Prevent.

Product Maintenance and After-Care

- Use a light touch when using a knife on your cutting mat especially when using a heavy duty knife or cutter.
- Clean with a light soapy water solution
- Your mat is likely to be delivered rolled up, so please unroll as soon as possible and lay flat. It may take 24-48 hours to lay completely flat due to the nature of the material. Store flat after initial unrolling, and avoid direct sunlight as this will encourage warping and eventually brittleness to the mat
- Once the first side is totally worn, the reverse can be used

Material Properties

Multi-layer PVC Self Healing Cutting Mat

- ☒ Solvent proof and resistant to most chemicals
- ☒ Waterproof
- ☒ Heat Resistant
- ☒ Complies with REACH Conformable regulations

Recycling and REACH Properties
